

RECOVERY MOVIE MEETUPS™

The **Recovery Movie Meetups** Program is a new and dynamic mutual support meeting format and plug-and-play school curriculum where teens and young adults - either alone, with their peers and family members, or in school classes - can watch great movies about addiction and recovery and then engage in fun, interactive, highly therapeutic discussion afterwards - guided by the **Teen & Young Adult Movie Guide to Successful Sobriety**.

Each Workbook features film summaries on 20 key addiction & recovery-related films, movie trivia, character breakdowns, evaluation of each film's impact and relevance, fascinating thought experiments, and Motivational Interviewing-based questionnaires that participants can fill out during or after the screening to then reflect upon alone, or share and discuss in group meetings with friends, family, or school classes.

This curriculum is a fresh, innovative, clinically-validated (see **Advisory Committee** below) compliment to your existing facility programming or school curriculum and gets your participants energized and engaged in their own avoidance or recovery process.
